Benefits: Root Power functions as a strong soil conditioner, bio-remediator and biological pest control, through its composition of various bioactive molecules, with each seaweed phyla offering various benefits to soil and crop health. These benefits can include increased tolerance to abiotic stressors, improved soil texture and water retention, and reduced occurrence of diseases. Root Power changes the fixation properties of the soil by increasing the buffering nature of the soil. This in-turn improves and optimises the uptake of nutrients in plants. Root power promotes the conversion of soil nutrients to available forms. Root power biologically stimulates the growth and proliferation of desirable micro-organisms in the soil.

Contents :
Humic Acid : 67% , Organic Sea Weed Extract : 28%

Application : Apply 5Kg/Acre Root Power at the time of top dressing. After application of Root Power, irrigate the field. Enough moisture should be available in the soil for continued nutrient mobilisation. Second application is recommended at the time of next application of fertilizers for long duration crops. Root Power can also be applied by drip irrigation as it is fully soluble in water.

Compatibility : Root Power is compatible with all agricultural inputs. Root Power efficacy increases when mixed with organic manure and synthetic fertilisers.

Net Wt. : 1 kg

Batch No. :

Date of Mfg. :

M.R.P. ₹ :
(incl. of all taxes)

Mfg. Lic. No. :

Storage : Store in a dry and cool place.
Avoid direct sunlight and moisture.

Best before three years from the date of manufacturing.

Tolerance to abiotic stress

Improved water retention

Optimises uptake of nutrients

Reduced occurrence of diseases

Stimulates growth of desirable micro organisms

NET WT.:
1kg
